

Embed it on my website

Let your customers book a table directly on your website. You can customize your widget with your brand assets.

1 Copy this code

```
<iframe  
src="https://widget.thefork.com/7beffe40-786f-496c-b196-48b939750c77"  
allow="payment *"  
style="width: 100%; min-height: 800px; border: none; overflow: scroll;"  
></iframe>
```

2 Paste the code on your website

Go to the page where you want the content to show. If you are using a website builder, look for an option like "Add Embed Code" or "HTML Block." Paste the code there, and the content will show on your page. [object Object]

3 Save and publish

If you're unsure, you can always reach out to your website provider's support team for help.
